A motivated front-end developer with hands-on React internship experience at Galaxy Software Services, currently pursuing a dual Bachelor's in Computer Science and Master's in Cyber Security. I am passionate about building responsive, user-friendly web applications and have a strong interest in securing digital systems. With a solid foundation in both software development and cybersecurity principles, I bring a unique perspective to developing secure, high-quality applications. I am eager to contribute and grow in dynamic tech environments that value both innovation and security.

## EDUCATION

### Bachelor of Computer Science / Master of Cyber Security (2023 – Dec 2026)

- The University of Queensland (UQ)
- Overall GPA: 6.35
- Dean's Commendation for Academic Excellence (2023)
- UQ International Excellence Scholarship

## EXPERIENCE

### Front-End Developer Internship (React, Styled Component, Git)

Dec 2024 – Jan 2025

Galaxy Software Services (GSS) in Taiwan

- Developed a **custom UI component library** to create a unique and consistent design system, resulting in enhanced user experience and reduced reliance on third-party frameworks.
- Collaborated with both front-end and design teams in **daily Scrum meetings**, contributing to reusable, accessible, and scalable components while ensuring alignment with design prototypes, ultimately improving overall product quality and development efficiency.
- Mastered **Git for version control** and **GitLab** for streamlined collaboration, actively participated in code reviews to maintain high-quality standards.

### Mandarin-English Translator Internship

June – July 2024

Galaxy Software Services (GSS) in Taiwan

- Created engaging cybersecurity content for non-experts, simplifying key concepts and boosting customer understanding.
- Translated **5 GSS product-related** articles from English to Mandarin and **35 cybersecurity articles** from Mandarin to English, improving information accessibility for diverse audiences.
- Facilitated communication between cybersecurity and marketing teams, providing strategic advice on relevant topics to enhance client awareness and engagement.

### UQ EAIT Student Ambassador

March – Present

acted as a bridge between UQ and prospective STEM students – inspiring curiosity, breaking down barriers, and equipping future engineers and technologists with practical advice and real student insight.

## VOLUNTEER

### UQ Welcome Weeks 2025

Empowered new students to confidently navigate campus by leading interactive tours and providing personalized wayfinding assistance, ensuring a smooth transition to university life.

### UQ OPEN DAY 2024

Proactively guided and supported visitors to key locations, addressing their inquiries and enhancing their overall experience of UQ Open Day.

### UQ Women in Computing OPEN DAY 2024

Inspired and mentored high school students by sharing my personal journey in computer science at UQ, increasing their interest and confidence in pursuing STEM fields
