A motivated front-end developer with hands-on React internship experience at Galaxy Software Services, currently pursuing a dual Bachelor's in Computer Science and Master's in Cyber Security. I am passionate about building responsive, user-friendly web applications and have a strong interest in securing digital systems. With a solid foundation in both software development and cybersecurity principles, I bring a unique perspective to developing secure, high-quality applications. I am eager to contribute and grow in dynamic tech environments that value both innovation and security.

## EDUCATION

### Bachelor of Computer Science / Master of Cyber Security (2023 – Dec 2026)

- The University of Queensland (UQ)
- Overall GPA: 6.35
- Dean's Commendation for Academic Excellence (2023)
- UQ International Excellence Scholarship

## PROJECT

### My Portfolio Website [GitHub](#)

A personal portfolio react website showcasing my experience, projects, and certificates.

### Weather Application [GitHub](#)

A React-based weather app that provides weather updates via manual search or browser-based geolocation.

## EXPERIENCE

### Front-End Developer Internship (React, Styled Component, Git)

Dec 2024 – Jan 2025

Galaxy Software Services (GSS) in Taiwan

- Developed a **custom UI component library** to create a unique and consistent design system, resulting in enhanced user experience and reduced reliance on third-party frameworks.
- Collaborated with both front-end and design teams in **daily Scrum meetings**, contributing to reusable, accessible, and scalable components while ensuring alignment with design prototypes, ultimately improving overall product quality and development efficiency.
- Mastered **Git for version control** and **GitLab** for streamlined collaboration, actively participated in code reviews to maintain high-quality standards.

### Mandarin-English Translator Internship

June – July 2024

Galaxy Software Services (GSS) in Taiwan

- Created engaging cybersecurity content for non-experts, simplifying key concepts and boosting customer understanding.
- Translated **5 GSS product-related** articles from English to Mandarin and **35 cybersecurity articles** from Mandarin to English, improving information accessibility for diverse audiences.
- Facilitated communication between cybersecurity and marketing teams, providing strategic advice on relevant topics to enhance client awareness and engagement.

### UQ EAIT Student Ambassador

March – Present

acted as a bridge between UQ and prospective STEM students – inspiring curiosity, breaking down barriers, and equipping future engineers and technologists with practical advice and real student insight.

## VOLUNTEER

### UQ Welcome Weeks 2025

Empowered new students to confidently navigate campus by leading interactive tours and providing personalized wayfinding assistance, ensuring a smooth transition to university life.

## **UQ OPEN DAY 2024**

Proactively guided and supported visitors to key locations, addressing their inquiries and enhancing their overall experience of UQ Open Day.

## **UQ Women in Computing OPEN DAY 2024**

Inspired and mentored high school students by sharing my personal journey in computer science at UQ, increasing their interest and confidence in pursuing STEM fields

## **Brisbane BiG Day In**

Inspiring 200 students from Year 9-12 to explore technology and university life.
